**DETAILED DESCRIPTION**

---

[Detailed explanation of a design]

[0001]

[The technical field to which a design belongs]

This design is related with the sanitary napkin by which coloring or encaustic attachment was carried out around the rear face and the wing.

[0002]

[Description of the Prior Art]

about coloring of this design, or an encaustic attachment portion, light pink and a white object mostly come out, and the conventional product has them, and when sense of incongruity is produced to a color tone with the wing circumference when the arrival at the bottom of other colors is worn, and the arrival at the bottom of \*\*\*\*\* is worn, unless the arrival at the bottom is worn in piles, it has a possibility that it may be recognized also from the outside that it is among physiology

[0003]

[Problem(s) to be Solved by the Device]

Wear worn the bottom which agreed to the hobby idea, without having recognized from the outside that it is among physiology is enabled, is doubled, the fashionability of a sanitary napkin is raised, and they are things.

[0004]

[Means for Solving the Problem]

When it equips with a napkin for wearing the bottom, a problem is solved by enabling it not to recognize having equipped with the napkin from the exterior easily by, and planning a sense of togetherness with the arrival at the bottom. [ the napkin rear face and the wing circumference which can be recognized from the outside ] [ color or ] [ encaustic ] Simultaneously, the image of a consumer called sanitary items is changed, the fashionability of the napkin itself is raised, and a technical problem is solved.

[0005]

[The form of implementation of a design]

It equips for wearing the bottom by the same method as the conventional sanitary napkin with a wing.

[0006]

[Example]

It equips with a sanitary napkin with the wing section which performed coloring of the arrival at the bottom and the same color which are worn at the time of physiology.

[0007]

[Example]

When the arrival at the bottom worn at the time of physiology is with a pattern, it equips with a sanitary napkin with the wing section which gave the analogous pattern.

[0008]

[Effect of the Device]

Mental coolness at the time of un-\*\*\* physiology can be planned to the conventional sanitary napkin

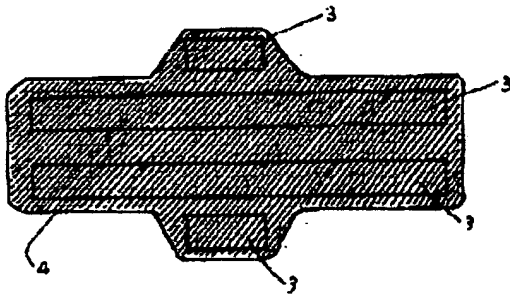

having pursued only physiological coolness by realizing a sense of togetherness with the arrival at the bottom as mentioned above by this design.
